

CS-417 INTRODUCTION TO ROBOTICS AND INTELLIGENT SYSTEMS

A Quick history

Ioannis Rekleitis

Robot

Talos (Τάλως/Τάλων) 400 BC

- A giant man of bronze who protected Europa in Crete, circling the island's shores three times daily while guarding it.
 Shore-length of Crete is 1.046 km.
- •Average speed 130 Km/h

Automatons

Antikythera, 150–100 BC

Heron of Alexandria (Ηρων ὁ Ἀλεξανδρεύς)

10-70AD

One of the first sensors: Odometer.

Heron of Alexandria

Automatons

"Canard Digérateur", 1793

"The Turk"

1770

Tea serving automaton

19th Century, Japan

Word "Robot"

• *"Rossum's Universal Robots" a novel by* Karel Čapek, 1920.

Mobile Robots: 1950

• Walter's Tortoise

Shakey (1966 - 1972)

- Shakey (Stanford Research Institute/SRI)
 - the first "autonomous" mobile robot to be operated using AI techniques
- Simple tasks to solve:
 - To recognize an object using vision, given a very restricted world
 - Find its way to the object
 - Perform some action on the object (for example, to push it over)
 - Perform compound actions and basic planning.

Stanford Cart

- 1973-1979
 - Stanford Cart developed by Hans Moravec
 - Use of stereo vision.
 - Took pictures from several different angles
 - The computer gauged the distance between the cart and obstacles in its path to do basic collision avoidance
 - About 15 min to think about each image, then drives 1 foot or so.

Industrial history: 1961

Industrial history: Unimate

Armed for duty. A Unimate robot—really, just an arm— CS-417 Introduction to Roboticsiaks intelligenus/sizens parts in a General Electric factory.

Industrial history: Puma 1978

Robot Vehicle (Late 80's)

- VaMoRs: Highway driving
- Tracking white lines with Kalman filtering (Dickmanns)

Mid 90's: CMU's Navlab 5

- Drove 2797/2849 miles (98.2%) on highways
- Throttle/Brake manually handled.

CS-417 Introduction to Robotics and Intelligent Systems

Exploring Mars

More Current Data

- **Opportunity**, Sol **3349** (June 27, 2013), 37 Km
- **Spirit**, Sol 2210 (March 22, 2010), 7.7 km

Highlights: Mapping the Titanic

Ryan Eustice, Hanumant Singh, John Leonard, Matthew Walter and Robert Ballard, <u>Visually</u> <u>navigating the RMS Titanic with</u> <u>SLAM information filters</u>. In Proceedings of the Robotics: Science & Systems Conference, pages 57-64, June 2005.

Highlights: Many Quadrotors

V. Kumar, GRASP Lab, University of Pennsylvania

Highlights: DARPA Grand Challenge

- 2004: Mojave Desert USA, 240 km
 - CMU Sandstorm traveled the farthest distance, completing 11.78 km
- 2005: Mojave Desert USA, 240 km
 - Stanford's Stanley, first place 6h54m
 - CMU's Sandstorm, second place 7h05m

Highlights: DARPA Urban Challenge 2007

• George Air Force Base, California. 96 km urban area course

CMU's BOS, first place 4h10m

Stanford's Junior, second place 4h29m

Highlights: DARPA Robotics Challenge

- 1. Drive a utility vehicle at the site
- 2. Travel dismounted across rubble
- 3. Remove debris blocking an entryway
- 4. Open a door and enter a building
- 5. Climb an industrial ladder and traverse an industrial walkway
- 6. Use a tool to break through a concrete panel
- 7. Locate and close a valve near a leaking pipe
- 8. Replace a component such as a cooling pump

Highlights: DARPA Robotics Challenge

Driverless Car

- Safer
- More efficient
- Enable people
- The Nevada law went into effect on March 1, 2012, and the Nevada Department of Motor Vehicles issued the first license for a self-driven car in May 2012. The license was issued to a Toyota Prius modified with Google's experimental driverless technology.
- Google driverless car, with a test fleet of autonomous vehicles that as of May 2012 has driven **282,000** km.

Another trend Mobile Manipulation

The robots have only interpreted the world, in various ways; the point is to change it¹.
